Good morning, class. Today, we'll explore the rich history of American comics. It all began in 1842 with *The Adventures of Mr. Obadiah Oldbuck*. This book had simple stories with pictures. Parts of it first appeared in a New York newspaper. Other newspapers then started to have various genres of comics, from family life to adventure tales. Their comic creator later introduced key elements like speech bubbles. By 1934, the first true comic book was on sale, setting the stage for famous characters like Superman. This marked the start of the Golden Age of Comic Books. However, in the 1950s, people worried about how comics might affect young readers. This concern led to new rules that limited what could be in comics. In 1956, the Silver Age of Comic Books brought back

superheroes. Then, in 1970, Marvel Comics introduced many new superheroes. This period was called the Bronze Age of Comic Books, which lasted until 1985. It included a mix of traditional superhero tales and new comics that explored fresh ideas. Now, years later, America's comics keep growing and changing, and keep telling stories that Americans love. (Oct. Unit 11)
