Part 3: Short Talk Questions (3%)

Listen to the following paragraph and answer the questions.

Rock climbing is an exciting sport that challenges both the body and mind. Climbers use their hands and feet to move up natural rock formations or artificial climbing walls. The sport requires strength, balance, and problem-solving skills to find the best way to reach the top. There are different types of rock climbing, including bouldering, sport climbing, and traditional climbing. Bouldering is done on shorter walls without ropes, while sport climbing uses fixed anchors for safety. Traditional climbing requires climbers to place their own protection as they move up. Rock climbing became an official Olympic sport in 2021, highlighting its growing popularity. It is not only a great workout but also a way to enjoy nature. Whether indoors or outdoors, rock climbing helps build focus, endurance, and confidence.
