What $E = mc^2$ = learn from Einstein is we can explore our selves
by thinking. Inside our brain lies a small universe, which
is full of mystery waiting for us to solve.

Answer the following questions about this book:

1. Did you like or dislike the book? Why?

I like it. It has ~~taught~~ ^{taught} me an easy way to become ^a successful.

2. Would you recommend this book to a friend? Why or why not?

Yes. Because Einstein is a well-known person, but ~~of~~ ^{few} people

3. (If the book is fiction) Who was your favorite character? Why?

(If the book is non-fiction) What new information did you learn? ^{know about him}

"Thinking" is the most great thing to ~~make~~ ^{make} you become smart.

4. If you could change anything about the book, what would you change? Why?

The illustrations, I couldn't understand what they are about.

5. What connection from this book can you make to your personal life? Why did you choose it?

No

My Discovery 心得: (80~100 words)

After reading this book, it gives me two impressions.
First, It changes my original viewpoint of "Thinking". Thinking is not
just an action which is invisible, it is a way that
can improve our intelligent, and it doesn't ~~need~~ ^{take} any practice,
in free time. if we can "think", it must be a new diversion?
second, no knowledge ~~cannot be divided~~ ^{cannot be divided} ~~into~~ ^{into} the good or evil, it just
like a sword, it can ^{be} used to save people's life, or to
take away people's life, so, we can't criticize Einstein just
because the idea of the atomic bomb is from his study.
